## UTAH DIVISION OF WILDLIFE RESOURCES CATCH & RELEASE RECORD FISH APPLICATION FORM

## **GENERAL INFORMATION**

PLEASE READ THIS FIRST

This Catch & Release record program was established to allow anglers the opportunity to be recognized for catching a large fish without having to kill the fish. This record program is largely based on the honor system with **emphasis on the live release of the fish.** The record is based entirely on the **length** of a fish. If there is any information, either from the photo or from other witnesses that the fish was stressed, detained, abused or transported from the capture-site the application will be denied. The fish should be measured, photographed and released as quickly as possible without injury. Preferably the fish should not be removed from the water.

- 1. The fish must have been legally taken by angling following the regulations in the current Utah Fishing Proclamation. Any information indicating that it was not legally taken will be grounds for disqualification.
- 2. The fish must have been caught from a public fishery where the public has free access.
- 3. Each qualifying fish must be submitted individually within 30 days of the catch.
- 4. The fish should be measured to the nearest \_ inch. Measure from the tip of the snout (with mouth closed) to the tip of the tail, along the side of the body.
- 5. Witness information and a clear side view color photograph <u>must be</u> submitted with the application. The witness must be present on the water during the measurement and release of the fish.
